## Measurement & Verification Services

Honeywell is pleased to provide this comprehensive report of your energy consumption. This report was processed using an industry-standard program based on proven and accepted engineering formulas for energy conservation and analysis.

<b>Service Contract Number:</b>	40105934
<b>Baseline Period:</b>	Average of 2004, 2005 & 2006
<b>Guarantee Period:</b>	January 2011 - December 2021
<b>Guarantee Term:</b>	12 Years
<b>Report Preparation By:</b>	Honeywell -Americas M&V Services: Charlie Hanna, M&V Specialist Joel Bruedigam, Energy Analyst
<b>Current Reporting Period:</b>	January 2015 through December 2015

## Locations Included in Report

- PA-61 Matopas Hills
- PA-62 William Penn Housing
- PA-63 Chatham Estates Family

# Methodology

ECM #	ECM Description	Post-Installation Option	Performance Period Option
1,2,3	Retrofit Common, Tenant Area and Exterior Lighting	B	A
4	Water Conservation	B	A (for Chatham Gas), C, for gas/water meters identified in D.1.4.1.1
7	High Limit Thermostats	A	C- for selected gas meters in D.1.4.1.1
8	Hot Water Boiler and Domestic HW Heater Replacement	A	C- for selected gas meters in D.1.4.1.1

Excerpt from Schedule B:

“**Option A**” is a verification approach that is designed for projects in which the potential to perform needs to be verified, but the actual performance can be stipulated based on the results of the “potential to perform and generate Savings” verification and engineering calculations. Option A involves procedures for verifying that:

- Baseline conditions have been properly defined; and
- The equipment and/or systems that were contracted to be installed have been installed; and
- The installed equipment components or systems meet the specifications of the contract in terms of quantity, quality, and rating; and
- The installed equipment is operating and performing in accordance with the specifications in the contract and meeting all functional tests.

“**Option B**” is for projects in which the potential to perform and generate Savings needs to be verified; and actual performance needs to be measured (verified). Option B involves procedures for verifying the same items as Option A plus verifying actual performance of equipment component or system. Performance verification techniques involve engineering calculations with metering and monitoring for verifying that:

- The installed equipment components or systems *at the end of the construction period* meet the specifications of the contract in terms of quantity, quality and rating, and operation and functional performance.

“**Option C**” is also for projects in which the potential to perform needs to be verified and actual performance during the term of the contract needs to be verified. Option C involves procedures for verifying the same items as Option A plus verifying actual achieved energy savings during the term of the contract. Performance verification techniques involve utility whole building meter analysis.

“**Option D**” is a verification technique where calibrated simulations of the baseline energy use and/or calibrated simulations of the post-installation energy consumption are used to measure Savings from the Energy Conservation Measures. Option D can involve measurements of energy use both before and after the Retrofit for specific equipment or energy end use as needed to calibrate the simulation program. Periodic inspections of the equipment may also be warranted. Energy consumption is calculated by developing calibrated hourly simulation models of whole-building energy use, or equipment sub-systems in the baseline mode and in the post-installation mode and comparing the simulated annual differences for either an average year or for conditions that correspond to the specific year during either the baseline or post-installation period.

## **2.0 Summary**

# Executive Summary

---

Honeywell is pleased to provide the Chester Housing Authority(CHA) , with this Year One Energy Audit Report. This report was prepared using engineering formulas for energy conservation, analysis, onsite interviews with building operators and documented on-site observations.

The Chester Housing Authority, Energy Conservation Project Phase I, is now being managed in the Service and Measurement and Verification (M&V) phase of the project.

The M&V performance period requirements for this project are consistent with and based upon discussions and agreements between representatives from Honeywell International Inc., HUD, and the Winder Housing Authority.

The Energy Conservation Measures (ECMs) that were a part of this project are the following:

- Common and Tenant Area Lighting
- Exterior Lighting
- Water Conservation
- High Limit Thermostats
- HW and DHW Boiler Replacement

The annual energy savings have been summarized on the following pages. These savings include the amounts guaranteed by Honeywell per Schedule D of the contract that will cover debt service payments and service costs each year. ECMs are funded through the Add-On Subsidy and Tenant Paid Allowances.

# Energy Cost Avoidance Summary

---

January 2015 - December 2015

Water Savings (Option C)	(\$113,168)
Gas Savings (Option C)	\$49,027
Electric Savings (Option A)	\$27,288
Rolling Base Year Savings (Stipulated)	\$0
Adjustments	\$392,381
Total Energy Cost Avoidance	<u>\$355,528</u>
Annual Guarantee	\$ 276,614
Rolling Base Year Savings (Stipulated)	\$ -
	<u>\$276,614</u>
Net Results	\$78,913
Percent of Plan	129%

## Savings by Utility Type

ECM #	ECM Description	Total Annual Savings	Annual Energy Savings Natural Gas	Annual Energy Savings Electric	Annual Water Sewer Savings
1	Common Area Lighting Retrofit	\$4,324		\$4,323	
2	Tenant Area Lighting Retrofit	\$14,155		\$14,155	
3	Exterior Lighting Retrofit	\$13,677		\$13,677	
4	Water Retrofit	\$149,991	\$40,403	\$0	\$109,589
5	Building Weatherstripping & Caulk				
6	Attic and Crawl Space Insulation				
7	High Limit Thermostats	\$14,408	\$14,408		
8	HW and DHW Boiler Replacement	\$46,473	\$46,473		
		\$243,028	\$101,283	\$32,155	\$109,589

### Year 6

ECM #	ECM Description	Tennant Paid Allowances	Total Annual Savings	Frozen Base Year
1	Common Area Lighting Retrofit		\$4,323	
2	Tenant Area Lighting Retrofit		\$14,155	
3	Exterior Lighting Retrofit		\$13,677	
4	Water Retrofit		\$173,882	
5	Building Weatherstripping & Caulk			
6	Attic and Crawl Space Insulation			
7	High Limit Thermostats		\$16,702	
8	HW and DHW Boiler Replacement		\$53,874	
	Savings w/out Rolling Base Year Savings		\$276,613	
	Rolling Base Year Savings		\$0	
	<b>Year 6 Guaranteed Savings Total:</b>		\$276,613

# Guarantee Table

## I. Schedule of Savings

The total cost avoidance over the Term of the contract is equal to or greater than \$3,785,620 as defined in the table below (comprised of energy and rolling base year cost avoidance): This table reflects Honeywell's annual guarantee, which will provide the Customer the amount needed to cover the principal amount to be paid to a financial institution, the interest amount to be paid to a financial institution, and on going M&V costs to be paid to Honeywell, for each performance year. The total shown is the cost of the project over the 12 year term (see projected cash flow at end of this schedule D.1.a).

Project: Chester Housing Authority				Annual Guarantee Summary						Honeywell	
Phase 1 Price	\$	2,761,582

Tenant Area	126,425	\$12,352
Exterior Lighting	64,575	\$6,309
		<b>\$27,288</b>

## Common Area Lighting

Retrofit existing fluorescent lighting fixtures with T-8 lamps and electronic ballasts. Replace incandescent bulbs (where feasible) with screw-in compact fluorescent lamps. Replace incandescent fixtures (where practical) with fluorescent fixtures. Company will properly dispose of all lamps and fixtures in accordance with all EPA requirements and standards for "hazardous materials." Company's cost does not cover replacing any cracked or yellowed lenses of the fixtures that are to be retrofitted with new bulbs and ballasts.

# ECM 4 - Water Conservation

ECM	Gas	Electric	Water
Faucet Aerator	\$19,752		\$59,794
Showerheads	\$12,813		\$35,417
Water Closets	\$7,838		\$14,377
	<b>\$40,403</b>		<b>\$109,589</b>

### Faucet Aerators

Replace all aerators in Bathrooms with new 0.5 gpm and Kitchens with new 1.5 gpm low flow type.

### Showerheads/Wands

Replace all showerheads and hand held shower wands in all bathrooms that have these items presently with new 2.0 gpm low flow type.

### Water Closets

Replace 3.5 gpf and 1.6 gpf water closets with new 1.0 gpf pressure assisted water closets to save water consumption.

# ECM 8 - Replace Boilers in Rhodes & Eisenhower

---

ECM	Gas	Electric	Water
Replace Boilers in Rhodes & Eisenhower	\$46,473		

Install one (1) new high efficiency (87% minimum) gas-fired hot water boiler (or approved equal). The boiler shall be 300 Boiler HP with a heating output capacity of 10,000 MBH capable of producing 180 °F to 200°F hot water. The boiler shall have a turndown ratio of 4:1 that will modulate the boiler's output down to twenty-five (25) percent of full output capacity.

Keep one of the existing 400 HP Kewanee gas-fired steam boilers. Recondition the burner. Provide new operating and safety controls. The boiler to be used for standby.

Install two (2) new 1,400 gpm hot water circulating pumps with 40 hp high efficiency electric motors. Select pumps to meet the proper head.

**Sites: Matapos Hills**

**ECM: Replace Heating and Domestic Hot Water Boilers**

**Savings Calculation:**

	Existing Heating cost	Existing efficiency	Proposed efficiency	Occupancy rate	Annual Gas Savings
Matapas Hills	\$ 237,831	70%	87%	Bldg 100% htd	\$46,473

## Report Delivery Receipt

---

Honeywell has presented the Cost Avoidance Review for Chester Housing Authority, Contract No. 40105934. This report details energy savings results for Calendar Year 2015 and indicates a total cost avoidance of \$355,528 for the calendar year compared to the annual guarantee/rolling base year savings of \$276,614. The net savings for January 2015 – December 2015 is \$78,913.

**Please sign below to acknowledge receipt of this report. Your signature does not indicate acceptance of the results.** If the results are not agreed upon, Chester Housing Authority has forty-five (45) days from the delivery date of this report to provide a detailed explanation and request for action, in writing, to Honeywell International, Inc., Energy Analyst, 5006 103<sup>rd</sup> Street, Lubbock, TX 79424. Otherwise, the cost avoidance results will be deemed accepted.
